Delivering Health Solutions That Work

MediHerb was co-founded in 1986 by world-renowned phytotherapist, Professor Kerry Bone. In his words, "Our passion at MediHerb is to unlock the healing power of plants by combining the time-honored wisdom of traditional knowledge with sound clinical experience and the rigor of scientific research. This quest can only be attained by the total commitment to quality and continuous improvement which permeates every aspect of our endeavors."

In over 25 years of operation MediHerb has not only demonstrated an unwavering commitment to quality in herbal products, we have redefined it. We believe our unique approach to quality sets a standard for herbal products that is unsurpassed in the world today.

Kerry Bone and over 20 health care professionals work within MediHerb while still maintaining their own clinical practices. We know from our experience that the quality of a product you take makes a huge difference to the health outcome you experience. We dedicate ourselves to researching and making the best possible products to deliver you health solutions that work.

Maintaining Healthy Hormones

Tribulus

MEDI HERB

Tribulus – Maintaining Healthy Hormones

The benefits of maintaining healthy hormone levels go well beyond reproduction. Your hormone levels are important for your overall feeling of well-being, vitality and stamina. Talk to your health care professional today about MediHerb's Tribulus, a unique product designed to support normal hormone production.*

What is Tribulus?

MediHerb's Tribulus is a herbal supplement made from the highest quality raw herb, *Tribulus terrestris*, and the correct part of the plant, the leaves. It contains guaranteed levels of an important compound known as protodioscin, which has been shown clinically to support healthy hormone production and reproductive function in both men and women.*

How is Tribulus Unique?

Clinical trials in Bulgaria suggest that to be effective, Tribulus extract must contain substantial levels of protodioscin. Only the leaves of the plant grown in Central Europe contain this important compound. Many products contain the wrong part of the plant, the fruit, or contain Tribulus from other parts of the world. These products do not contain this very important compound. MediHerb has undertaken extensive research on Tribulus to provide you the best possible product every time. You can trust MediHerb's Tribulus.*

Who Needs Tribulus?

Everyone can benefit from using MediHerb's Tribulus tablets whether it's to improve your performance, enhance vitality, or support normal hormone levels. Tribulus is also highly recommended for couples. Ask your health care professional today if Tribulus could help you.*

Tribulus for Male and Female Health

At various times in our lives, we may be challenged by changes in our hormone levels. MediHerb's Tribulus offers a natural and safe support for both men and women during these difficult times.*

Tribulus has many applications for health, including menopause. An unblinded study of 50 women, where 52% were experiencing natural menopause and 48% who had post-operative symptoms after removal of their ovaries, reported good results for Tribulus. The women first took a placebo and later took an extract of Tribulus. Their main symptoms included hot flashes (100%), sweating (78%) and insomnia (82%). After taking Tribulus, 98% of the women reported symptom improvement! The women did not report symptom relief when taking the placebo. (A statistical analysis of the results was not conducted.)^{1*}

MEDI  HERB®

Compelling Benefits

MediHerb's Tribulus contains 100 mg per tablet of protodioscin and may:
